- [Accountify](#) – Premium Accounts Telegram Online Shop Bot
- [Beshkan](#) – Fast CLI DNS Switcher Cross-Platform Script
- [Noghteh-Bot](#) – Noghteh Project's Telegram Assistant Bot

EXPERIENCE

Fullstack Web Development, *React | Next | TS | Tailwind | Git | Docker | Figma*

Handled full-stack development with a **strict focus on premium Frontend architecture**, engineering highly scalable web platforms, TypeScript applications, and advanced PWAs. Expertly integrated dynamic global state management and modern styling frameworks (Next.js, React, Tailwind CSS) for elite digital products, including the Talakoob financial platform, **Noghteh** AI ecosystem, and corporate solutions for **Zaman Pardaz**, **Maral Setareh**, and **GajMarket**. Backed frontend excellence with solid DevOps capabilities, orchestrating secure Linux server deployments, Docker containerization, and Cloudflare optimizations while translating Figma layouts into pixel-perfect production code.

Desktop-App Development, *Python | Tkinter | PyQt | CustomTkinter | PipLibs*

Developed desktop applications for projects like **Mohajer-DMS**, **Epic Assistant**, and **Hooshify**. Focused on high performance, clean UI, and practical solutions that improved usability and workflow efficiency.

Automation & Script Development, *Python | JavaScript | Web-API Integration*

Created advanced automation bots and scripts for projects including **Alpha-Bot**, **Accountify**, and **Beshkan**. Specialized in Telegram and Discord bots, delivering seamless interaction, innovative features, and scalable automation systems.

EDUCATION

OCT 2025 – PRESENT

ISFAHAN NATIONAL UNIVERSITY OF SKILLS – MOHAJER

STUDYING FOR PROFESSIONAL COMPUTER ENGINEERING (BACHELOR) AT MOHAJER UNIVERSITY.
